How to free convert files on Mac with MPEG Streamclip?
As a simple to use application, MPEG Streamclip for Mac allows you to directly drag and drop the file to the program and then do various modifications such as the Video PID, Audio PID and Audio mode as well..
The video player included in MPEG Streamclip lets you preview the files and transport streams before doing the conversion; it also lets you visually set the In and Out points for the conversion so you can convert just the part of the file you are interested in, and also cut commercials and other unwanted parts, or edit the stream and join two streams with Cut/Copy/Paste..
The download version of MPEG Streamclip is 1 2 1
This download is absolutely FREE..
Video conversion is performed in the YUV color space; you can choose to scale video to any frame size using a professional 2D-FIR scaler (better than bicubic) but you can also leave it unscaled..
After the application is downloaded, you just need to drag and drop the application from the DMG to the Applications folder.
